SUMMARY

Computer Science Engineering student with 3+ years of development experience building scalable mobile applications using Flutter and Firebase. Delivered real-world projects including secure OTP authentication systems and IoT solutions, with a strong focus on performance, usability, and reliability.

SKILLS

Languages: C++, Dart, Python, SQL

Mobile: Flutter, Android

Backend: Firebase, Firestore

Tools: Git, Android Studio

Web: HTML, CSS, JS

Concepts: DSA, UI/UX, Object-Oriented Programming, DBMS, Operating System

EXPERIENCE

Flutter Mobile Developer Intern — Webtree Software Solutions W.L.L 2025
Mangalore, India

- Developed cross-platform Flutter applications with REST API integration enabling efficient data communication and real-time functionality
- Implemented secure OTP-based authentication with responsive UI ensuring seamless multi-device user experience
- Improved app performance through code refactoring, optimized state management, and API testing using Postman

Research Lead — Hybrid Farming System 2026
IEEE Student Chapter, SRM Institute

- Led a team to build an IoT-based hydroponic farming system using Arduino sensors for automated environmental control
- Designed real-time monitoring and automation for water, nutrients, and growth conditions
- Increased water efficiency by 30% using data-driven irrigation and optimized resource management

PROJECTS

NAD Group Rewards & Gift Card App [Link](#)

- Built a corporate rewards and gift card application using Flutter during internship
- Integrated REST APIs, OTP authentication, and barcode redemption for seamless transactions
- Implemented secure digital wallet payments with transaction tracking and detailed history management

SlotBook — Appointment Booking App [Link](#)

- Developed a scheduling platform with real-time slot tracking and dynamic availability updates
- Used Firebase for secure authentication and real-time data synchronization across devices
- Designed an intuitive UI for fast and seamless appointment booking experience

VisionSecure — Smart Surveillance System

- Developed an AI-powered surveillance system capable of detecting suspicious activities using computer vision techniques
- Implemented real-time monitoring with automated alerts to enhance security and rapid response
- Designed a scalable architecture enabling integration with cameras and cloud-based data storage

EDUCATION

B.Tech — Computer Science and Engineering 2023–2027
SRM Institute of Science and Technology

Higher Secondary School 2019–2023
Narayana e-Techno School

ACHIEVEMENTS & AWARDS

- HackDroid 2025 — 3rd Place (among 122 teams)
- Ideathon Winner — SRM & St. Joseph College
- Event Organizer — Pitch Perfect 2024 (100+ attendees)

COURSES

- Mastering DSA using C and C++ — [Link](#)
- Flutter App Development — [Link](#)
- Networking Basics — [Link](#)
- Introduction to Machine Learning — [Link](#)
- Data Analysis with Python — [Link](#)
