Education

SRM Institute of Science and Technology

B.Tech – Computer Science and Engineering CGPA: 9.62 / 10.0 (5 Semesters, No Active Backlogs)

Chennai, India

2023 – 2027 (Expected)

Experience

JCS Group (JCS Global | JCS Hub | JCS Pay | Sunotal)

Developer Intern

Remote

Dec. 2025 – Jan. 2026

- Developed and delivered full-stack SaaS software solutions across fintech and agri-tech products; implemented backend integrations and feature enhancements following agile development practices.

VISWAM.AI (Swecha Internship)

AI / LLM Engineer Intern

Remote

Apr. 2025 – Oct. 2025

- Built NLP data pipelines for a Telugu Large Language Model; applied data preprocessing, statistical validation, and model calibration, conducting POC studies on applied AI research outputs.
- Reformulated unstructured linguistic data challenges into structured machine learning models; supported optimization workflows and quality benchmarks in an agile research environment.

Google for Developers (AICTE)

AI/ML Intern

Virtual

Jan. 2025 – Mar. 2025

- Trained and evaluated supervised ML models using TensorFlow on real-world datasets; applied statistical optimization and performance calibration techniques for production-ready model deployment.

Life Turn Institute

Assistant Coding Instructor

Vijayawada, India

May 2024 – Present

- Delivered structured programming curriculum to 50+ students; built strong technical communication and presentation skills through live demos, mentorship, and instructional sessions.

Projects

FinQube | AI Financial Analytics Platform – Python, ML, Predictive Modeling, Optimization, Data Analysis

2025

- Developed AI-powered business analytics platform using ML predictive models and optimization algorithms; analyzed structured market datasets to generate data-driven portfolio intelligence and actionable investment recommendations.
- Designed end-to-end analytics pipeline covering data ingestion, model training, and insight generation—mirroring revenue management and retail intelligence system workflows.

C-ADAS | Road Hazard Detection – Python, Django, YOLOv8, OpenCV, REST API

2025

- Built real-time anomaly detection system using YOLOv8 and Python; integrated Django REST API backend for automated alert generation, live monitoring, and data-driven operational decision support.

Technical Skills

Data Science & Analytics: Python, TensorFlow, Scikit-learn, NLP, Statistical Modeling, ML Algorithms, Optimization, Data Analysis

Software Engineering: Django, REST API, JavaScript, HTML/CSS, Agile Development, Git

Cloud & Infrastructure: AWS (Solutions Architect Certified), Oracle Cloud (OCI), Docker, Kubernetes, Linux

Databases: MongoDB, SAP HANA (ABAP)

Certifications

Introduction to Machine Learning – NPTEL

Jul. 2025

AWS Certified Solutions Architect – Amazon Web Services

Jun. 2025

AWS Generative AI – Amazon Web Services

Apr. 2026

SAP Certified Development Specialist (ABAP for SAP HANA) – SAP

Apr. 2026

MongoDB Certified Developer, Associate – MongoDB

Apr. 2026

Leadership & Achievements

Chairperson, SRMIST ACM Student Chapter

ACM India Region 4 Coordinator – Tamil Nadu & Kerala

Chennai, India

Oct. 2024 – Present

- Led 200+ member technical community; organized hackathons, workshops, and data-driven events; delivered technical presentations and product demos demonstrating strong communication and stakeholder engagement skills.
